Aluminium panels of 5000 - 7000 series are the absolute combination of modern and classic design character in a great variety of different designs and colors to choose.

The stamped panels are externally constructed with suitable shaped aluminium sheets and internally they composed of a special high density sound and thermal solid material.

The imprinting of the design is created with a pioneering method by creating a stamped external curved frame which provides the best aesthetic and quality result.

They are fitted with double sound and thermally insulated window glasses. Between the glasses there are transoms on a brass, white and inox option, or aluminium safeties.

The replacement of the glass, when that becomes necessary, is very easy due to the special rubber placed to the inside part of the panel.

The 5000 - 7000 series stamped panels are available in a great variety of powder - coated colors as well as wood colors covering every style.

- Modern and classic character.
- Enormous range of designs and double crystals.
